magnum cantilever chair, wood

The **magnum** chair with its clear and simple design demonstrates a successful synthesis of lightness and modernity as well as a high degree of hand-craftsmanship and technical finesse. A new wood design has now been added to the popular **magnum** cantilever range. The discrete stand-alone design of the steel cantilever chair creates a beautiful contrast with the sensual oiled wood of the seat. The ergonomically designed wooden seat offers a high level of comfort and is made from special plywood from sustainably managed forests. Extensive veneer working gives the surface of the chair the appearance of solid wood. Beautiful forms and functionality: The profile of the back support tapers elegantly towards the top for an improved spring effect – a beautiful detail which reflects the unrivalled competence of this manufacturer in creating wood products. The new **magnum** cantilever chair is available in oak, cherry, walnut and core beech and fits in perfectly with the rest of the **magnum** range.
